

Epson printhead application guide

Sign & Graphic

Advantage of Epson printhead

Compatibility with many different substrate materials and inks

Signage printing requires compatibility with a wide variety of substrate materials and inks. Different printhead combinations are required in order to support different substrate material and ink combinations.

Epson has a broad lineup of printheads. We have heads in widths ranging from 1 inch to 4 inches, heads that are compatible with eco-solvent, UV, and aqueous inks, and heads that support 4 colors or 8 colors. Epson heads allow you to develop platforms that will serve as a base for the creation of wide variety of different printers to meet the diverse needs of customers.

PrecisionCore' s high-precision dot placement technology

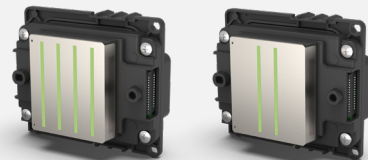

Epson' s PrecisionCore technology enables the accurate and stable ejection of ink. This will allow you to output signs and graphics that are more beautiful and eye-catching than ever.
